

Course synopsis

Jenrick Engineering is working in partnership with Skills4Stem Ltd. to deliver the Institute of Leadership and Management (ILM) Level 5 Engineering Award for Leadership and Management.

Designed to directly address the STEM skills shortages throughout the UK, the ILM course structure focuses on the real-world challenges that engineering leaders and managers face, by utilising a learning and assessment programme that is built around your specific workplace.

This maximises the value of the learning experience for the managers, whilst enabling them to address live workplace issues while on the course.

Who are these qualifications for?

The ILM Level 5 Award Leadership and Management is designed for practising middle managers, helping them to develop their skills and experience, improve performance and prepare for senior management responsibilities.

The qualifications are made up of a broad range of units covering skills in six core areas:

- Leadership Capability & Performance
- Developing financial skills and management
- Leading innovation and change
- Developing critical thinking
- Understanding organisational culture and ethics
- Managing stress and conflict within an organisation

Benefits for individuals:

- Use core management techniques to drive better results
- Develop your ability to lead, motivate and inspire
- Provide strategic leadership as well as day-to-day management
- Benchmark your managerial skills
- Raise your profile in your organisation

Benefits for employers:

- Encourage strategic thinking at this level of management, to foster business improvement
- Engage middle managers with training and development – this qualification is designed to provide clear, measurable benefits to career-minded professionals.
- Customise this qualification to your development needs
